WORK EXPERIENCE

20/03/2017 – 31/05/2021 Istanbul, Türkiye

Sharepoint Developer Magiclick Digital Solutions

The web site of company <https://www.magiclick.com/>

I worked for this company for a long time. I started as a junior for about 1.5 years. My career progression journey started after I grasped projects and started to love sharepoint.

I used the following technologies on this company
Sharepoint 2010,Sharepoint 2013,Sharepoint 2016,Sharepoint 2019,workflow, timerjob,custom web part,,C# ,html ,css tfs,git
The company I worked for had an average of 200 employees.80% people was software team, the rest was Pm(Project Manager).I worked as a sharepoint developer in the software department.The companies we worked with were generally corporate companies and bank .

Here is projects I have been working on :

<https://www.isyatirim.com.tr/>

This is project with the bank's investment partnership. This project built on sharepoint 2016 technology.

I was worked on workflow , custom web part ,html, c#,mssql on this project.

<https://www.odeabank.com.tr/>

This is odeabank bank's web site.I spent most of my time on this project workflows,custom web part etc.

I have supported this project for about 2 years

I also worked on the sharepoint intranet of odeabank.This intranet built on sharepoint onprem technology too.

Also I worked on this banks intranet project which built with sharepoint 2013 <https://www.denizbank.com/>

I patched the Sharepoint servers and also provided solutions to the problems encountered on the basis of the network of the servers together with the network team.

07/06/2021 – 03/12/2021 Istanbul, Türkiye

Sharepoint Developer Nuevo SoftwareHouse

The web site of company is <https://www.nuevo.com.tr/>

The technologies which I used on this company :

Sharepoint 2010,Sharepoint 2013,Sharepoint 2016,Sharepoint 2019,C# ,Asp.Net,MSSQL,TFS,Git,JIRA

In this company, I worked on existing sharepoint projects of corporate companies.

My projects :

Istanbul Airport <https://www.istairport.com/> (Sharepoint 2013)

Here is a sharepoint web part of the ring information returned from the json service.

I got it displayed on the page using . Here is the link of my work <https://www.istairport.com/en/passenger/transport/airport-transfers/havaist?locale=en>

Norm Holding Company (Sharepoint 2019)

This was intranet of holding company.In this project , I have enabled the users coming from the service provided by the customer to log into the system with FBA by making the distinction between blue and white collars.

Açev

This was project built with sp2010. I have transferred large size data from sharepoint lists, document libraries in sp2010 project to a sharepoint online project using the tools provided by microsoft (via Sharegate)

14/02/2021 – 01/08/2021 İstanbul, Türkiye

Sharepoint Developer Softtech

I worked as an outsource at Softtech, a subsidiary of İşbank.

- During the time I worked here, I supported and worked on the <https://www.maximum.com.tr/> application until I built it from scratch in the sharepoint infrastructure and transferred it to the end user. I created and supported features such as custom web part, workflow, permissions by user groups, etc.
-In parallel, I developed additional features by supporting the isbank website <https://www.isbank.com.tr/>, which is also in the sharepoint infrastructure.

08/08/2021 – 30/04/2023 İstanbul, Türkiye

Sharepoint Developer OG00 Digital Agency

The company I worked for <https://www.ogoodigital.com/>

I've been worked on Sharepoint (onprem) projects. I also worked on sharepoint online (o365) , list migration, adding custom properties to list columns.

The technologies which I using on this company :TFS,git ,JIRA,Sharepoint 2019 Subscription Edition,Sharepoint Online,C#,CSOM

-Also I developed coding with csom (client site object model). I have been worked on patching CU(cumulative updates) Sharepoint servers, sharepoint server installation etc.

-I took part in the transition of the application from sharepoint 2016 to Sharepoint 2019 Subscription Edition

-I developed .Net based web services for Android and IOS applications.

-I positioned the jobs I wrote with the console on Azure and enabled them to be used as web jobs for sharepoint online applications.
